A removable clip is placed on the top edge of the dish permitting the stain solution to drain back into the reservoir from the tilted rack. The actual capacity of the small dish is 250ml, but only 150ml is needed which provides a savings on staining liquids, developing fluids and intermediates. Made from black polyoxymethylene-poly-acetal-plastic, the dish is easy to clean and especially suited to store enzymes. The cover will not jam in freezer storage. **Per each, 24 per case.**
