

### All-Polyethylene Poly-Hand Pumps

The self-contained Poly-Hand Pump works independently of air pressure, requires no adapters and delivers by positive pressure on the down stroke of the piston. The pump will deliver against a 3.65 meter (12ft) head of water and will empty a drum or carboy to within 3mm ( $\frac{1}{8}$ ) of the bottom. Made entirely of polyethylene, it is inert to strong acids, alkalis and many solvents. All pumps individually packed.

*Mounted in plug designed to fit 30 gallon drums.*

Mounted on (2") standard V threaded polyethylene plug, 59cm (23 $\frac{1}{4}$ ") length for 132 liter (30 gallons) drum. Fits through minimum opening of 51mm (2").

CATALOG NO.	PRICE/EACH

### Vacuum Aspirator Pump

A high-density polyethylene aspirator pump that operates on water pressure above 11psi (7584 N/m<sup>2</sup>). The integral check valve resists corrosive filtrates and fumes. A quick-disconnect hose fitting accepts 6.4 to 9.5mm ( $\frac{1}{4}$  to  $\frac{3}{8}$ ") I.D. tubing. The male thread faucet connection is 9.5mm ( $\frac{3}{8}$ ") I.D. Maximum attainable vacuum is 696mm Hg (27.4") with a flow of 6 liters (1.5 gallons) per minute. *Per each, 12 per case.*

### Syphonette

The Scienceware® Syphonette is made from polypropylene and polyethylene and is particularly well suited to withdrawing liquids from narrow necked containers with a minimum opening of 19mm ( $\frac{3}{4}$ "). The inlet tube, made of rigid polypropylene, is 66cm (26") long but may be permanently shortened by cutting. Operated by squeezing the flexible bulb, the self priming mechanism starts flow through the flexible vinyl outlet tube. Flow will continue as long as the end of the outlet tube is kept lower than the source liquid. The Syphonette will also elevate fluids to higher levels if

pumping is continued. Special adapters for cans, tanks, and bottles are available on special order.
