

Pipette Aid

Safe, Easy and Economical Alternative

This pipette aid is used by squeezing, then releasing, the bulb to draw fluid into the pipette. The pipette aid is then removed, and the pipette top quickly covered with a finger to control and release fluid. The bulb is Vikem® Vinyl with a tapered polyethylene chuck for quick removal when pipette is filled. **6 per bag, 2 bags per case.**

The Scienceware® Bulb Pipettor

The Scienceware® Bulb Pipettor saves time and eliminates mouth pipetting. Its tapered silicone rubber seal provides an airtight fit on all size pipettes. An excellent aspirator for use with Westergren or Wintrobe sedimentation tubes. May be opened, cleaned and steam autoclaved whenever necessary. Comes complete with an elastic cord for dedicating that pipettor to a specific reagent bottle. Autoclave at 121°C (250°F). **Per each, 100 per case.**

H37888-0000	\$20.70

Bel-Bulb™ Pipettor

The Bel-Bulb™ Pipettor is a simple suction device with a soft tapered chuck to fit pipettes from 6 to 8mm in diameter. The flexible vinyl bulb is 5cm diameter x 7cm long (2 x 2 1/4"). After filling your pipette, remove the bulb and quickly cover the top of the pipette with a finger to hold fluid or release it as needed. **2 per bag, 6 bags per case.**

Use Labmat™ Liners to Keep Benchtops Dry and Spill Free, See Page 124

Accropet® Pipettors

Accropet® Pipettors provide fast, accurate one handed operation for filling and dispensing standard micro pipettes or capillary tubes. Simply insert a pipette, and rotate the knurled knob at the top with your thumb and forefinger clockwise to aspirate fluid, counter clockwise to dispense. O-ring construction assures positive, leakproof action to maintain accuracy. An adjustable chuck holds pipettes firmly in place and allows for rapid changes. Made from durable polypropylene which will withstand temperatures up to 121°C (250°F).

Ultra-Micro Accropet® Pipettor handles all pipettes up to and including 200µl.

H37912-0030	\$21.00

Pipette Filler

Simple Operation for Filling and Dispensing from Pipettes

This Vikem® vinyl squeeze-bulb pipette filler has greater chemical resistance than standard rubber bulbs. It accommodates pipettes from 5 to 14mm in diameter. Three pinch valves are coded for use. The filler may be operated with one hand by pinching valve control pad "A" with your thumb and index finger while squeezing the bulb with three fingers and palm. The bulb will remain collapsed when pad "A" is released. Then squeeze pad "S" to aspirate liquids into the pipette. Squeezing pad "E" dispenses liquid from the pipette. Bulb is 54mm (2 1/8") in diameter, overall length is 152mm (6").

A. Transpette™ 8 Channel Transfer Pipettor

Patent Des. 368,142

Economical and Disposable

Now you can perform plate washing, feeding and supernatant collection with one of the most unique pipetting devices available. The Transpette™ Pipettor is an inexpensive, disposable, 8-channel transfer pipettor which can deliver and remove liquids from your microwell plates without the use of pipettors and pipette tips. To avoid radiation contamination of your expensive liquid handling devices, discard the Transpette™ Transfer Pipettor after "hot" radioactive uses. Molded of translucent plastic, the Transpette™ pipetting device holds 600µl per channel. Available sterile or non-sterilized. Cannot be autoclaved.

25 per bag.

F37877-0000	Bulk packed, non-sterile	\$42.00
F37877-0001	Individually packed, radiation sterilized	57.50

Mono-Block™ 12 Well Reservoir

Pipette 12 Different Liquids at Once

The Mono-Block™ Reservoir accommodates standard single, eight and twelve channel pipettors. It is compact enough to be held comfortably in your hand and stable enough for bench top use. Each well has a v-shaped bottom and holds 5ml. The polypropylene unit measures 118 x 38 x 46mm high (4.6 x 1.5 x 1.8") and is autoclavable at 121°C (250°F). **3 per bag, reservoir cover and tray sold per each.**
