

Automatic Burettes

Self Zeroing Glass Burettes

These burettes have easy to read blue graduations against a white background. The delivery end is fitted into a plastic push button stopcock which permits drop by drop delivery. A small screw clamp adjusts drop speed as needed for titration. A polyethylene filling tube extends from the top of the burette into the bottle reservoir. Bottle, screw cap, and round base are polyethylene. Graduation accuracy is Class B. **Per each, 12 per case.**

Automatic Self Zeroing Burettes

Closed System Avoids Outside Contamination

Borosilicate glass burettes have white 0.1ml graduations and are mounted to a polyethylene screw cap and bottle. Squeezing the flexible bottle forces liquid into burette. Overfill drains back into bottle when pressure is released. The drain arm has a 2mm bore glass stopcock. Large, stable plastic base can be detached from reservoir. Accuracy of burette is within 1% of total volume. Graduation accuracy is Class A.

Rotary Pipette Stand

Turn to the Pipette You Want

This unique stand holds a maximum of 94 pipettes and rotates on a central vertical axis for convenient selection of a pipette. The lower rotating disc consists of four concentric troughs with tapered sides and open bottoms which cradle the tips protectively and permit liquid to run off. The upper rotating disc has a grid pattern concentric with the bottom disc keeping the pipettes vertical. Liquid draining off the pipette tip is retained on top of the stationary base by the outer rim. A low center of gravity stabilizes the 48cm high (18¾") stand. Rotating disks are 18cm (7½") diameter. Made of polypropylene and PVC, it comes unassembled with instructions for quick assembly on the 23cm (9") diameter base.
